DETERMINATION

Request has been: Approved Denied Approved with Conditions

Primary Zoning Resolution or Code Section(s): AC 28-101.4.5, BB 2016-012

Other secondary Zoning Resolution or Code Section(s):

DOB NOW Request Number: PDA00004819

COMMENTS:

The premises is a 5-story, Old Law Tenement, Class A Multiple Dwelling residential building of Construction Classification Class 3—Non-Fireproof, built in 1875 under New Building Application # 96/1875. The subject building is located in the Sullivan- Thompson Historic District.

The applicant is requesting an clarification to review and accept that utilization of the 2022 Building Code may be applied for the subject landmark building, which requires extensive structural repairs. The proposed repair endeavors will result in an expansion of the existing floor surface area by over 110 percent.

The request is approved as follows:

- Pursuant to AC 28-101.4.5: Work that increases existing floor surface area of a prior code building by more than 110 percent:
 "Notwithstanding sections 28-101.4.3 and 28-102.4.3 or any other provision of this code that would authorize alterations of prior code buildings in accordance with the 1968 building code or prior codes, where the proposed work at the completion of construction will increase the amount of floor surface area of a prior code building by more than 110 percent, over the amount of existing floor surface area, such entire building shall be made to comply with the provisions of this code as if it were a new building hereafter erected. See Section 28-105.2 for permits for such work. Exceptions:...
 Based on the prevision above, if the proposed work at the completion of such construction increases the amount of floor surface area in said building by more than 110 percent, then that building needs to comply with the provisions of the current code as if it were a new building.
- Building Bulletin 2016-012 further provides guidance on calculating the percentage increase in surface floor area, explaining how to determine the percentage by which the floor surface area is increasing.

This CCD1 is approved ONLY for the specific request and conditions as noted above. The attached plans / documentation have not been reviewed beyond the context of the specific request and shall not be deemed as having been reviewed and approved in accordance with applicable Zoning Resolution, Building and other Codes. DOB examiner shall verify that plans filed, comply with all the conditions of approval. If the work is professionally certified, the Applicant of record shall be responsible to verify that the proposed work is in compliance with the conditions of approval.

Note: If approved determination is not scanned, micro filmed or uploaded, it will be deemed invalid.

REVIEWED BY
 HONGYUAN SHAO, R.E.
 Code and Zoning Specialist

APPROVED WITH CONDITIONS
 Date 10/18/2024
 Page 1 of 23
 Control No. PDA00004819

NOTE: Determination will expire if construction begins and approval is not obtained within 12 months of issuance.

V. Examples

EXAMPLE 1 - Exterior Wall Remain:

Figure 1: Existing 1968 Code four-story building with cellar. All the floors above cellar to be removed. Exterior walls to remain.

Figure 3: Existing 1968 Code four-story building with cellar. Three of six floors to be removed. Exterior walls to remain.

Figure 2: Proposed four-story building with five new floors and one existing floor. 500% increase in Floor Surface Area - is considered an Alt 1 required to meet NB requirements.

Must comply with 2014 Code requirements for New Buildings.

Figure 4: Proposed four-story building with three new floors and three existing floors. 100% increase in Floor Surface Area - is not considered an Alt 1 required to meet NB requirements.

Permitted to comply with Prior Codes per AC 28-101.4.3
